EASY CARE STEPS FOR CLEANING HARDWOOD FLOORS

DO:

- Wipe up spills immediately.
- Vacuum, sweep or dust mop your hardwood floor once a week, or more, if needed. The vacuum head must be brush or felt, and a wand attachment is preferable.
- Use interior and exterior doormats at entrances to collect dirt and moisture and prevent it from being tracked onto the floor.
- Area rugs are recommended in front of kitchen sinks, at all pivot points and within high-traffic areas. The rugs must be made of a breathable material to prevent moisture entrapment.
- Place runners and area rugs (with slip-resistant backings) along high-traffic areas.
- Keep animal nails trimmed to prevent finish scratches.
- To prevent surface damage avoid rolling heavy appliances and furniture on the floor. Use plywood hardboard or appliance lifts, if necessary.
- Replace hard, narrow furniture rollers with wide rubber rollers.
- Keep the relative humidity in your home between 35% and 55%.
- Try to protect your floor from direct sunlight.

DON'T:

- Use any of the following products (or products similar in nature) on your floor: ammonia based cleaners, acrylic finishes, wax based products, detergents, bleach, polishes and oil soaps, abrasive cleaning soaps or acidic materials such as vinegar.
- Allow water to stand on your floor for any length of time – wipe up immediately.
- Walk across your floor in poorly maintained shoes with heel taps, spike heels or with any sharp object protruding from your shoe.
- Allow furniture to rest on the floor on small metal tips or hard domes.
- Use rubber, foam back or plastic mats as they may trap moisture and possibly discolor your floor.
